Detailed Description
... threat to an organization's infori-nation security.

  Employees with access to information resources including **email** , the
  Internet, and on-line networks significantly increase the security risks.

  Employees are using **email** for personal purposes creating questions of
  appropriate use of company resources, workplace productivity and
  appropriateness of message content. One of the greatest sources of
  information leaks is employee sent **email** . With electronic communication
  and networks, an electronic paper trail is harder to determine, since no
  ...

...authorized and unauthorized file access and disclosure, link hard copy
  information with electronic files including **email** , and report on how
  information flows in and out of an organization.

  Setting proper use...
...occur if policy violations are not consistently reported, filed,
  investigated, and resolved.

  Employees often view **e - mail** as equivalent to a private conversation.
  This view often does not reflect the official position...according to an
  embodiment of the invention;
  Figure 32 is an exemplary screen display illustrating **Email** Compliance
  according to an embodiment of the invention;
  Figure 33 is an exemplary screen display...of the invention;
  Figure 43 is an exemplary screen display illustrating a System Violation
  Notice **Email** and Snail Mail Notice according to an embodiment of the
  invention; 1 5 Figure 44...represents the document management system of
  the compliance

information and personal safety training , optional registration of an
encryption...s hardware and software inventory information, as well as
the user's name, user's **email** address, user's surface mail address,
employment status (e.g., temp, contract, virtual), title, department...a
software license is about to expire. The system administrator is prompted
to send an **email** to the licensing organization to update the license
agreement. Once the updated license agreement is received via **email** .
the system automatically updates the software license registered and
stored in the compliance monitor I...

Claim
... method of claim 1, wherein the network security policy
   comprises:
   a network hardware policy;
   an **email** policy;
   an internet policy;
   1 5 a software license policy;
   a document management system policy...

Inventor: **JACOBSON A M**

Abstract (Basic):
...   For managing electronic records e.g. business **E - mail** ,
   personal **E - mail** , minute mail, purge confirmation report, intranet
   base **E - mail** , bulletin board **E - mail** etc on computer network...

...and monitoring helps to reduce the risk of data loss by accidental or
   intentional modification. **E - mail** authentication is ensured since
   the business **E - mail** message is copied immediately after the network

user stores or forwards the E – mail message...

Abstract (Basic):
...   The computer readable memory has **code** that directs the
processor to display an e-mail client graphical user interface and the
code to direct the processor to receive selection of a reply icon from
user input device. The **code** directing the processor to automatically
generate an e-mail message addressed to the reply e...

...icon and which directs the processor to indicate that message has been
sent is also **stored** .
...   a computer readable memory which includes a code that directs
the processor to display an **e - mail** client graphical user interface
including a reply icon. A code directs the processor to receive a
selection of the reply icon which includes clicking upon the reply icon
on the **e - mail** client graphical user interface on the display. A
code directs the processor to generate an **e - mail** message which
includes a predetermined message **indicating** a request to **remove** the
user **e - mail** address from the SPAM **e - mail** mailing list. The
predetermined message includes a remove message. A code directs the
processor to automatically send the **e - mail** message to the reply **e.
- mail** address via an **e - mail** client in response to the selection
of the reply icon. A code directs the processor to indicate in a log
file that the **e - mail** message has been automatically sent. An
INDEPENDENT CLAIM is also included for **e - mail** client program
product for computer system...

Electronic record management method in computer network, involves creating and storing electronic tag to uniquely identify electronic record

Abstract (Basic):
...   Electronic **tag** which uniquely identifies an electronic record is created and **stored** . The electronic **tag** is generated from information analyzed by network users work station specification, user profile and a reference **code** . Then, the electronic record is distributed.
...   Permits network user to **selectively** interrupt the message **purging** process. File encryption tracking and monitoring helps to reduce the risk of data loss by accidental or intentional modification. **E - mail** authentication is ensured since the business **E - mail** message is copied immediately after the network user stores or forwards the **E - mail** message...

ELECTRONIC MAIL SYSTEM

                        ABSTRACT
... BE SOLVED: To easily capture an added part by adding new data to a
received **electronic**   **mail**   for preparing an **electronic**   **mail** ,
separating the received **electronic**   **mail** data from the added content
data, and transmitting it.

SOLUTION: A first **electronic**   **mail** device receives and **stores** the data
of a document 200 from a second **electronic**   **mail** device, and displays
the data on a display. A user **designates** and **deletes** unnecessary
graphic **elements** 202 and 203 from the displayed document 200 by a
keyboard, and re-displays the document 210 on the display. The user inputs
graphic **elements** 221 and 222 to be newly added by the keyboard for
addition edition, and displays...

... document 220 on the display. Data indicating division between the
document 210 and the graphic **elements** 221 and 222 are added to this, and
transmitted to a third **electronic**   **mail** device. The third **electronic**
 mail   device displays the document 220 on the display, and only the
graphic **elements**   221 and 222 to be newly added can be displayed by the
operation of the...
